### 13.04.04 // april update

Slightly late bringing you this months update, but as you will see, there have been a few changes. The obligatory coding improvements (with some visual eye-candy for those not browsing with the standards unaware Internet Explorer may I add) alongside some actual content for a change. 5 - yes FIVE new reviews have been added to the new and improved reviews section - after much criticism from 'Tess the Dog' (thanks Kris!) and Lewis - thou sadly still the same three albums! I will add more soon though - promise.

### 08.04.04 // warning
